

Indicators that were NOT selected for Phase 1

Appendix E

Topic	Indicator	Standard	Reason not Included
MENTAL HEALTH			
Complaints	Complaint rate per 1000 patient days	None available	Interpretation is unclear
CARDIOLOGY			
Acute myocardial infarction	Acute myocardial infarction inpatient mortality rate	IHI	Not risk adjusted
CARDIOLOGY & GENERAL MEDICINE			
Heart failure	% Pneumococcal vaccination	IHI	Primary care role
Heart failure	% Influenza vaccination	IHI	Primary care role
Heart failure	% Perfect care - all elements met	IHI	Not all elements included
HEALTHCARE ACQUIRED INFECTION			
MRSA rates	% Compliance with active surveillance cultures on admission	IHI	Use other agreed indicators
MRSA rates	% Compliance with hand hygiene	IHI	Use other agreed indicators
MRSA rates	% Compliance with MRSA contact precautions	IHI	Use other agreed indicators
MRSA rates	% Compliance with room cleaning	IHI	Use other agreed indicators
MRSA rates	MRSA bloodstream infections per 100 admissions	IHI	Use other agreed indicators
MRSA rates	Transmission of MRSA	IHI	Use other agreed indicators
Clostridium difficile rate	Number of Clostridium Difficile infections per 1000 patient days		Use other agreed indicators
MEDICINES MANAGEMENT			
Medical harm	Medical harm rate per 100 admissions	IHI	Subjective interpretation of harm
Medical harm	Medical harm rate per 1000 patient days	IHI	Subjective interpretation of harm
EARLY WARNING SYSTEMS TO DETECT DETERIORATING PATIENTS			
Rapid response	Utilization of rapid response team	IHI	Not calculated as a rate

Topic	Indicator	Standard	Reason not Included
GOVERNANCE			
Complaints	Complaint rate per 1000 patient days		Interpretation is unclear
ACCIDENT & EMERGENCY			
Accident & emergency	% Children in severe pain receiving analgesia within 20 mins arrival	BAEM	Cannot identify samples from current IT systems
Accident & emergency	% Children in severe pain reevaluated within 30 mins of first dose analgesia	BAEM	Cannot identify samples from current IT systems
Accident & emergency	% Hip fracture patients who received analgesia within 20 mins	BAEM	Cannot identify samples from current IT systems
Accident & emergency	% Patients with hip fracture who were x-rayed within 60 mins of arrival	BAEM	Cannot identify samples from current IT systems
GENERAL MEDICINE			
COPD	% Patients with hypercapnic resp failure who received non-invasive ventilation	NICE guidelines	Await Service Frameworks
COPD	% COPD patients with documented dyspnoea score at hospital discharge	NICE guidelines	Await Service Frameworks
COPD	% COPD patients with dyspnoea score 3+ who were offered pulmonary rehab	NICE guidelines	Await Service Frameworks
COPD	% COPD patients given self-management advice at discharge from hospital	NICE guidelines	Await Service Frameworks
COPD	% COPD patients who smoke who were offered cessation advice/referral	NICE guidelines	Await Service Frameworks
Stroke	% New stroke patients who had brain imaging within 24 hrs of admission	Royal Coll Physicians	Await Service Frameworks
Stroke	% Eligible stroke patients prescribed antithrombotic by hospital discharge	Royal Coll Physicians	Await Service Frameworks
Stroke	% Stroke patients who smoke who were offered cessation advice/referral	Royal Coll Physicians	Await Service Frameworks
Pressure ulcers	Pressure ulcer incidence per 1000 patient days	IHI	Not risk adjusted
Pressure ulcers	Pressure ulcer incidence per 100 admissions	IHI	Not risk adjusted
Footnotes			
IHI	Institute for Healthcare Improvement		
MRSA	Methicillin-resistant staphylococcus aureus		
BAEM	British Association of Emergency Medicine		
COPD	Chronic obstructive pulmonary disease		
NICE	National Institute for Health & Clinical Excellence
