
Acknowledgements

We would like to thank everyone who contributed to the production of this report. In particular we would like to thank

- Michael Mac Neill and Kevin Sweeney of the Central Survey Unit at the Northern Ireland Statistics Unit for making the data available and helping us to understand the structure and format of the questionnaire.
- Dr David Marshall of the Central Services Agency for helping to attach area characteristics to individual records.

We are also indebted to Mike Stevenson of the Department of Epidemiology and Public Health at Queens University Belfast who oversaw the statistical analysis in this report and Gemma Bruen for her helpfulness and efficiency in helping to produce the report.

Contents

CHAPTER		PAGE
	Sub-section	
1	INTRODUCTION AND SUMMARY	1
2	POPULATION CHARACTERISTICS AND DATA HANDLING	11
2.1	Introduction	11
2.2	Demographic and social characteristics	11
2.3	Socio-economic status	12
2.4	Area characteristics	14
2.5	Health measures	15
2.6	Use of health services	18
3	SOCIAL AND SOCIO-ECONOMIC INDICATORS: DISTRIBUTION IN SOCIETY AND INTER-RELATIONSHIPS	21
3.1	Introduction	22
3.2	Inter-relationships between selected variables	22
4	SELF PERCEPTION OF HEALTH	35
4.1	Introduction	36
4.2	Comparison of health measures	38
4.3	Social and economic factors	39
4.4	Logistic regression	44
4.5	Common conditions and recent illness	47
5	GENERAL HEALTH QUESTIONNAIRE	73
5.1	Introduction	74
5.2	Comparing Northern Ireland with England and Scotland	74

5.3	GHQ scores and social and economic factors	75
5.4	Relationship with self reported health measures	78
5.5	Logistic regression	79
6	SHORT FORM 36	91
6.1	Introduction	92
6.2	Comparing Northern Ireland with England	92
6.3	SF36 and social and economic factors	92
6.4	Relationship with self reported health measures	101
6.5	Logistic regression	102
7	USE OF SERVICES	129
7.1	Introduction	130
7.2	Social and economic factors	132
7.3	Logistic regression	136
