## *General Footnotes*

From the beginning of 2008/09, the Quarterly Outpatient Activity Return (QOAR) replaced the KH09 (Part 1) as the source of data relating to outpatient activity. As a consequence of this new methodology, the collection of data on scheduled and cancelled clinics has been replaced with the collection of data on appointments cancelled by both hospitals (hospital cancellations) and patients (Could not attend or CNAs). The definition of a did not attend (DNA) has been amended to also include CNAs on the day of the appointment. As a result of this amendment, DNA figures for 2008/09 are not directly comparable with those published in previous years.

During 2008/09, a number of patients were treated as part of Integrated Clinical Assessment and Treatment Services (ICATS). ICATS became an official service in the Trauma & Orthopaedics specialty on 01/10/07. A number of other services that are provided through an ICATS type model were operational during 2008/09. Activity at these services are included in the outpatient attendance figures for 2008/09.

During 2008/09 Health and Social Care Trusts in Northern undertook a process of reclassifying a number of outpatient services in the Mental Health Programme of Care, from a consultant led to a non consultant led model of service delivery. As a consequence of these reclassifications, data relating to activity within these services are no longer included within the outpatient data contained in this publication.

## Definitions

### Outpatient Services

An outpatient service is a consultant led service provided by Health and Social Care Trusts to allow patients to see a consultant, their staff and associated health professionals for assessment in relation to a specific condition. Patients are not admitted into hospital for this assessment. Outpatient services are usually provided during a clinic session providing an opportunity for consultation, investigation and minor treatment. Patients normally attend by prior arrangement. Although a consultant is in overall charge, they may not be present on all occasions the clinic is held. They must, however, be represented by a member of their team.

### Outpatient Appointment

An outpatient appointment is an administrative arrangement enabling patients to see a consultant, their staff and associated health professionals, following an outpatient referral. Outpatient appointments relate to all appointments with a consultant led service, irrespective of the location in which the service is performed.

### New Attendance

A new attendance is the first of a series or the only attendance at an outpatient service with a consultant or their representative following an outpatient referral. In practice, most referrals will be seen as a consequence of a GP referral request; however, referrals may also be received from a range of other sources (see Appendix 1). First attendances at an outpatient clinic that are initiated by the consultant, who has already seen the patient, are classified as review attendances i.e. following an attendance at an Accident & Emergency unit or following an inpatient admission.

### Review Attendances

A review attendance is an attendance at an outpatient service following; a new outpatient attendance, a previous review attendance, an attendance at an Accident & Emergency unit, a domiciliary visit, or following an inpatient admission, for the same condition. Essentially review appointments are all appointments that are not a first appointment.

### Did Not Attend (DNA'd)

This is the number of patients who did not attend, and failed to give advance warning to the hospital, for an outpatient appointment. This includes patients who cancelled their outpatient appointment on the same day on which the appointment was scheduled. These should not be confused with those who could not attend and who did warn the hospital in advance (before the day on which the appointment was scheduled).

### Could not attend (CNA'd)

This is the number of patients who did not attend, and gave advance warning to the hospital, for an outpatient appointment before the day of the scheduled appointment. These should not be confused with those who either did not attend without prior warning or those who could not attend and informed the hospital on the day on which the appointment was scheduled. This does not include appointments cancelled as a result of the hospital being notified of the patient's death.

## **Outpatient Appointment Cancelled by the Hospital**

This is the number of outpatient appointments that have been cancelled by the provider Health and Social Care Trust. A cancelled appointment is one which was intended to be held but which did not occur. Such cancellations do not include those cancelled by the patient (Could Not Attend), appointments the patient did not attend without giving prior notice (DNA) and appointments cancelled by the hospital as a result of the patient's death.

### **Reasons for Cancellation**

An outpatient appointment may be cancelled by either the provider Health and Social Care Trust (a hospital cancellation) or the patient (patient could not attend – CNA).

Hospital Cancellations may occur for the following reasons:

- Consultant unavailable
- Medical staff / Nurse unavailable
- Patient treated elsewhere
- Consultant cancelled appointment
- Appointment rescheduled (brought forward)
- Appointment rescheduled (put back)
- Cancelled following validation / audit
- Administrative error by hospital
- Hospital transport not available

Patient Cancellations (CNA) may occur for the following reasons:

- Patient cancelled appointment as it is no longer required
- Patient cancelled but the appointment is still required
- GP cancelled appointment

If no reason for cancellation has been recorded, Trusts report this as 'No reason for cancellation recorded'.

If an incorrect reason for cancellation has been recorded, for example if one of the hospital cancellation reasons are recorded against a patient cancellation, Trusts report the reasons for such cancellations as 'Incorrect reason for cancellation recorded'.

Cancellations due to the death of a patient are reported separately and should not be included within the figures for either Patient Cancellations (CNA) or hospital cancellations.

### **Private Patient Attendances**

A private patient is one who has opted to have treatment outside the Health Service and has undertaken to pay for all expenses incurred, including treatment and accommodation costs. Private patient attendances relate to private patients who attend an outpatient appointment at a facility provided by a Health and Social Care Trust.

### **Specialty**

A specialty is a particular branch of medicine or surgery. Each consultant is assigned a main specialty from a list recognised by the Royal Colleges and Faculties. Information is recorded against the specialty of the treating consultant.

**Explanatory Notes**

**Source:** The data contained in this publication have been compiled from the Quarterly Outpatient Activity Return (QOAR), which was introduced from 01 April 2008. They refer to all HSC hospitals in Northern Ireland that provide consultant led outpatient activity. Any amendments notified by providers after 21 August 2009 have not been included.

**Hospitals/Providers:** In accordance with the Review of Public Administration, with effect from the 01 April 2007, five new integrated Health and Social Care Trusts (Belfast, Northern, South Eastern, Southern and Western) replaced the previous eighteen provider Trusts in Northern Ireland. Tables have been presented based on the new Trust Areas.

**Data Availability/Format:** All of the data contained in the tables are also available on a quarterly basis and can be supplied by individual specialty or hospital/Provider if this level of detail is required (as in previous bulletins). In addition, data can be supplied in spreadsheet format (Microsoft Excel) in order to aid secondary analysis. The tables are also available at [http://www.dhsspsni.gov.uk/index/stats\\_research/stats-pubs.htm](http://www.dhsspsni.gov.uk/index/stats_research/stats-pubs.htm) for those with Internet access.
