Chief Executive, RMSC

Dear Colleagues

#### **Clinical guideline CG 22 – Anxiety (amended)**

This guideline focuses on the management of anxiety in adults in primary, secondary and community care. On 31 May 2006, the Medicines and Healthcare Regulatory Agency (MHRA) issued revised prescribing advice for venlafaxine. This amendment brings the guideline into line with the new advice.

DHSSPS advises that this guidance is valid for Northern Ireland and endorses it as good practice guidance for the HSC sector. The full guideline is available for download at: <http://guidance.nice.org.uk/CG22>

The HSC sector also should note that;

1. The Department expects the HSC sector to take account of this guidance in their delivery of services to patients suffering from Anxiety Disorders;
2. This advice does not override or replace the individual responsibility of health professionals to make appropriate decisions in the circumstances of their individual patients, in consultation with the patient and/or guardian or carer. This would, for example, include situations where individual patients have other conditions or complications that need to be taken into account in determining whether the NICE guidance is fully appropriate in their case;
3. NICE has developed tools to help organisations implement this guidance. These are available at <http://guidance.nice.org.uk/CG22> and include costing tools, implementation advice and audit criteria to monitor local practice;
4. NICE expects to make a decision on a full update in the near future.

Circular HSS (PPMD) (NICE)01/006 issued on 30 June 2006 provides further information on the Northern Ireland process for reviewing NICE guidance and further details on the local status of the Institute's guidance. This circular can be accessed at: [http://dhsspsni.gov.uk/nice\\_guidance\\_01-06.pdf](http://dhsspsni.gov.uk/nice_guidance_01-06.pdf)
