For Information

Chairs of HSS Boards
Chairs of HSC Trusts
Chief Executive, Regulation & Quality Improvement Authority
Chief Officers HSC Councils
Chief Executive/Postgraduate Dean, NIMDTA
Chief Executive, NIPPET
Chief Executive, NIPEC
Chief Executive, RMSC

Dear Colleagues

Clinical guideline CG 48 – MI: Secondary Prevention

This guideline provides best practice advice on secondary prevention for patients in primary and secondary care after an MI and identifies a number of key priorities for implementation which cover;

- Prescription of drugs;

- Physical activity; and
- Healthy lifestyle.

DHSSPS advises that this NICE clinical guideline is valid for Northern Ireland and endorses it as good practice guidance for the HSC sector. The Department is also developing a cardiovascular framework which will aim to ensure that HSC services are safe, effective, efficient, accessible, patient/client centred and equitable. The cardiovascular service framework will include standards for coronary heart disease, hypertension, cerebrovascular disease, peripheral vascular disease, diabetes, renal disease and hyperlipidaemia. It is due to be published in mid 2008.

The full NICE guideline and other related documents are available for download at:

<http://www.nice.org.uk/guidance/index.jsp?action=byID&o=11008>

The HSC sector also should note that;

1. The Department expects the HSC sector to take account of this guidance in their delivery of services patients following a myocardial infarction;
2. This advice does not override or replace the individual responsibility of health professionals to make appropriate decisions in the circumstances of their individual patients, in consultation with the patient and/or guardian or carer. This would, for example, include situations where individual patients have other conditions or complications that need to be taken into account in determining whether the NICE guidance is fully appropriate in their case;
3. NICE has developed tools to help organisations implement this guidance. These are available at <http://www.nice.org.uk/guidance/index.jsp?action=byID&o=11008> and include costing tools, implementation advice and audit criteria to monitor local practice;
4. This guidance will be updated by NICE as needed.

Circular HSS (PPMD) (NICE)01/006 issued on 30 June 2006 provides further information on the Northern Ireland process for reviewing NICE guidance and further details on the local status of the Institute's guidance. This circular can be accessed at:
