The TWA welcomes the exemptions for research and testing facilities. Research and Development facilities are a vital part of the manufacturing bases and as indicated in the Integrated Impact Assessment report “R&D jobs are usually an indicator of a company’s commitment to a location”. It is important that the functions of the R&D and testing facilities are correctly exempted in the regulations and that their existing functions are able to continue. These exemptions are vital for the continued employment and future job security of around 900 people that work at the Gallaher manufacturing plant and research and development facility at Lisnafillan.
