CAPITA
CONSULTING

Objectives

- Why is it important?
 - What we are doing about it
 - What you need to know
 - What you need to do
- 

Safety and Risk : what does it mean to you?

- As a user of Health & Social Services have you or anyone you know ever:
 - Had the wrong notes?
 - Had the wrong diagnosis?
 - Missed an appointment?
 - Had to spend longer in hospital than anticipated?
 - Made a complaint about health / social care?

What types of risk exist in health and social care organisations?

- Service Users: mishaps in treatment and care delivery
accidents
emotional distress/ill health
 - Staff: workplace accidents
workplace pressures
 - Visitors: accidents
damage to personal property
- 

Who / what suffers?

- Quality of Service
 - People
 - Resources
 - Reputations
- 
- A decorative horizontal bar at the bottom of the slide, consisting of five colored segments: purple, red, orange, light green, and grey.

Definition of Risk

The chance of something happening that will have an impact upon objectives. It is measured in terms of likelihood and impact.”

(AS/NZS 4360:1999)

What is Risk Management?

A process which involves planning, organisation and direction of a programme that will identify, assess and ultimately control risks

Mary Burrows 2002

The culture, processes and structures that are directed towards the effective management of potential opportunities and adverse effects

AS/NZS 4360: 1999

Why Risk Management is Important

To:

- Enhance quality of treatment and care services
 - Improve staff morale and productivity
 - Provide safer environment for staff
 - Improve public image
 - Prevent future incidents
 - Reduce costs of replacement, repair, and claims
- 

Why is Risk Management an Issue in the NHS

- 10.8% patients experienced an adverse event,

- Of these
- **49% judged preventable**
 - **34% developed injury or complication with moderate impairment**
 - **6% permanent impairment**
 - **Contributed to death 8%**

Media Headline

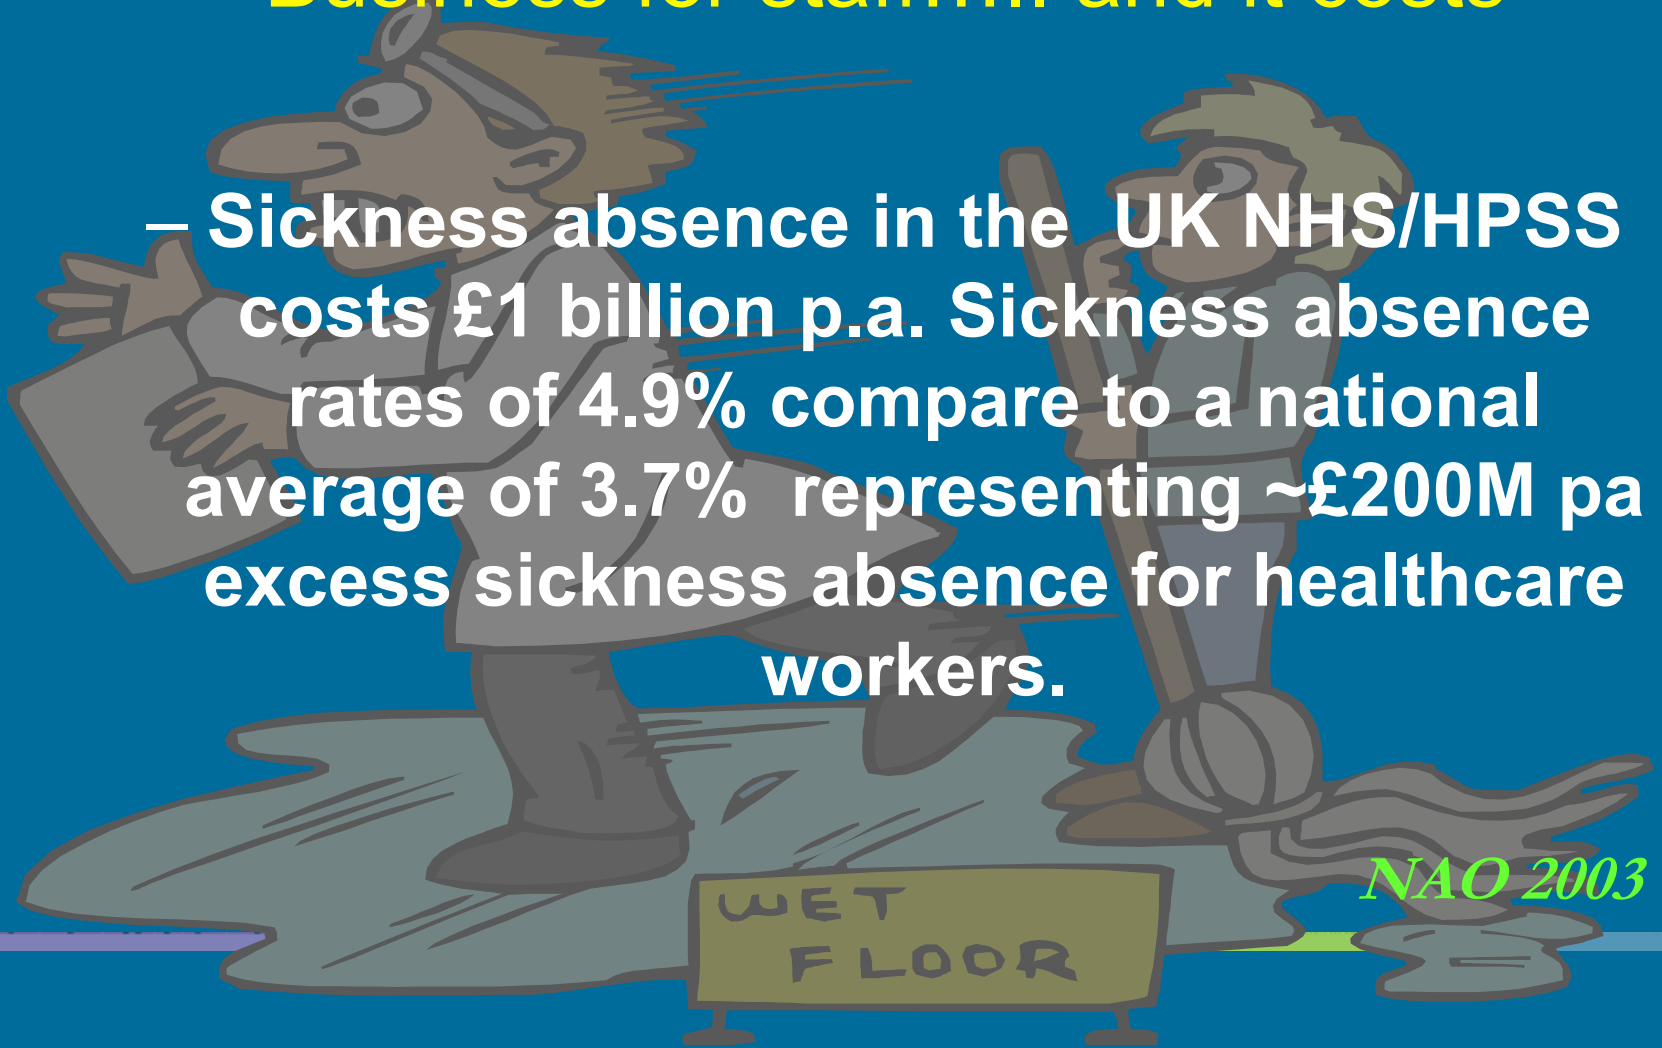

- Medical error kills ~ 40,000 a year in the UK and is the third most likely cause of death after cancer and heart disease (Vincent et al 1999)

Sunday Times
August 2000

Health and Social Care is a risky Business for staff..... and it costs

- **Sickness absence in the UK NHS/HPSS costs £1 billion p.a. Sickness absence rates of 4.9% compare to a national average of 3.7% representing ~£200M pa excess sickness absence for healthcare workers.**

Health and Safety At Work in the NHS/HPSS

The Health & Safety Executive has reported that every year, on average, there are:

- 135,000 accidents 2001/2
- 27 fatal accidents (mostly service users)
- 2,000 non-fatal major injuries (60% service users) *NAO 2003*

“These accidents follow similar patterns year after year”

“These could have been easily prevented if people had taken simple well known precautions”.

Cost of Work Related Accidents

- £173 million!
 - Work related sickness/absence
 - Permanent injury benefits
 - Ill health retirements
 - Out of court payments

NAO 2003

Adverse Events/Incidents

Some Important Definitions

HAZARDS

Something identified with the potential to cause harm.

RISK

The likelihood that those harmful consequences occur

Definitions

Incidents Any event that has given or may give rise to actual or possible personal injury, to patient/client dissatisfaction or to property loss or damage

Near Miss

Any event that did not lead to personal harm but could have, an occurrence which but for luck or good management, would in all probability have become a fully blown incident.

An Example

- An unsheathed needle lying on the floor is a **hazard**
- The **risk** is that someone receives a needlestick injury
- If the needle is picked up by a member of staff who places it, without injury, in a sharps box it was a **near miss**
- If someone picks it up and injures themselves before putting it in a sharps box this is an **incident**

Incidents, Events and Near Misses

Adverse incident

**Did it cause harm
or loss?**

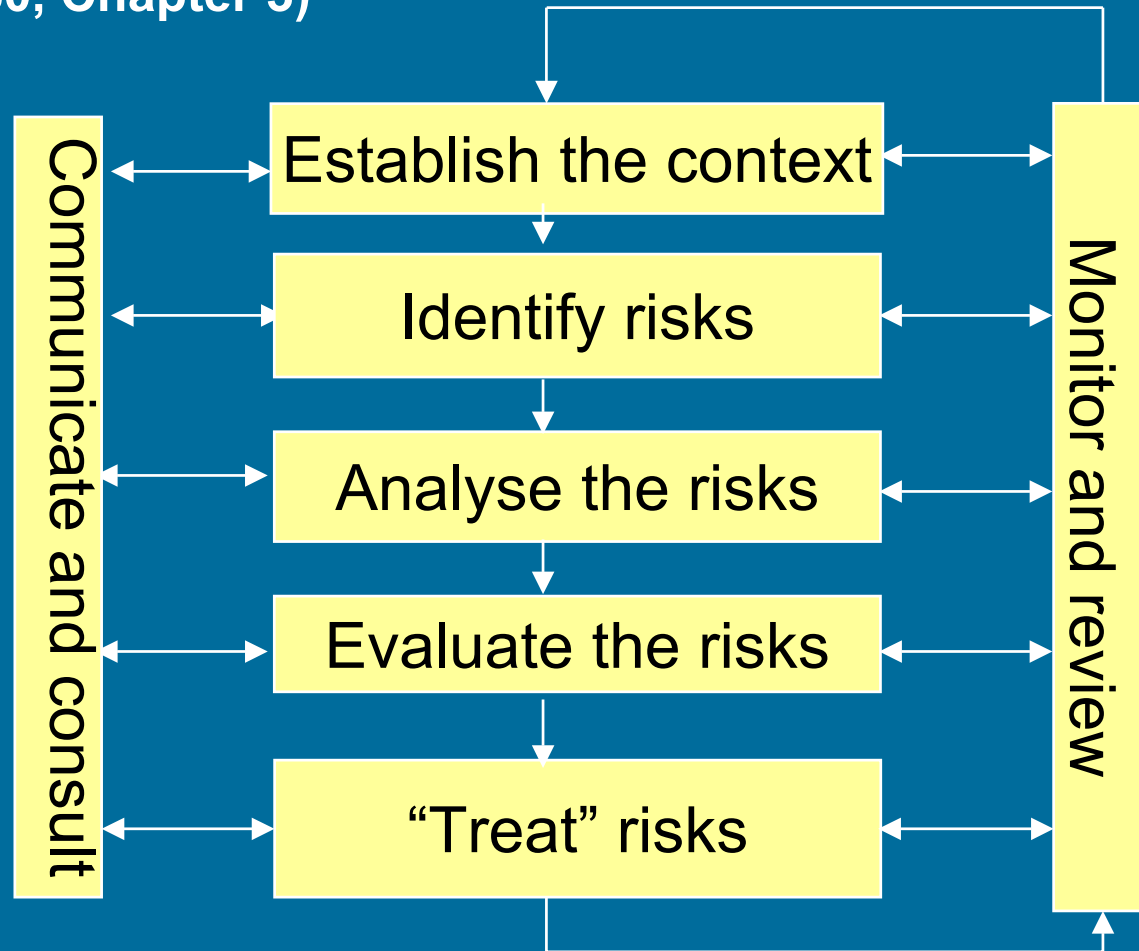

Yes

Event

No

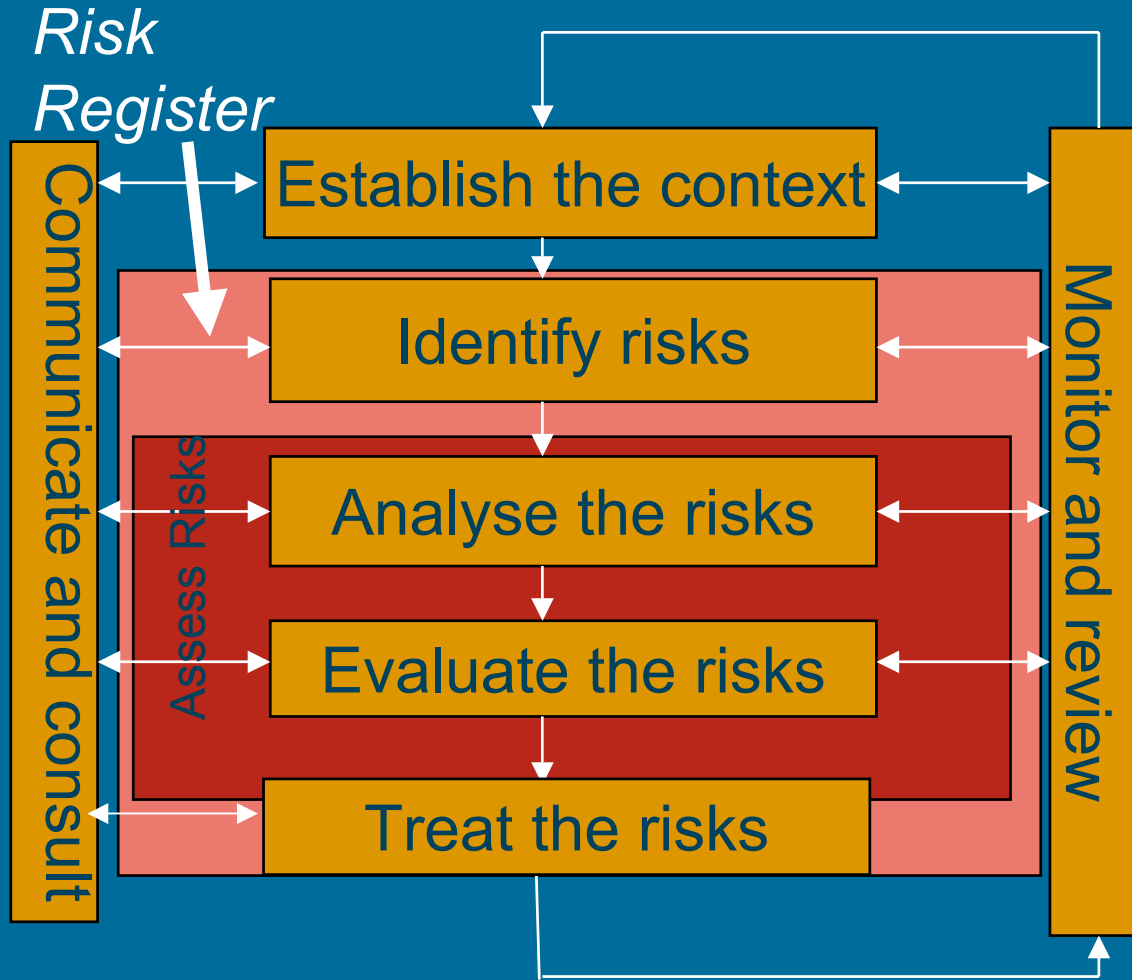

Near Miss

The Risk Management Process (AS/NZS 4360, Chapter 3)

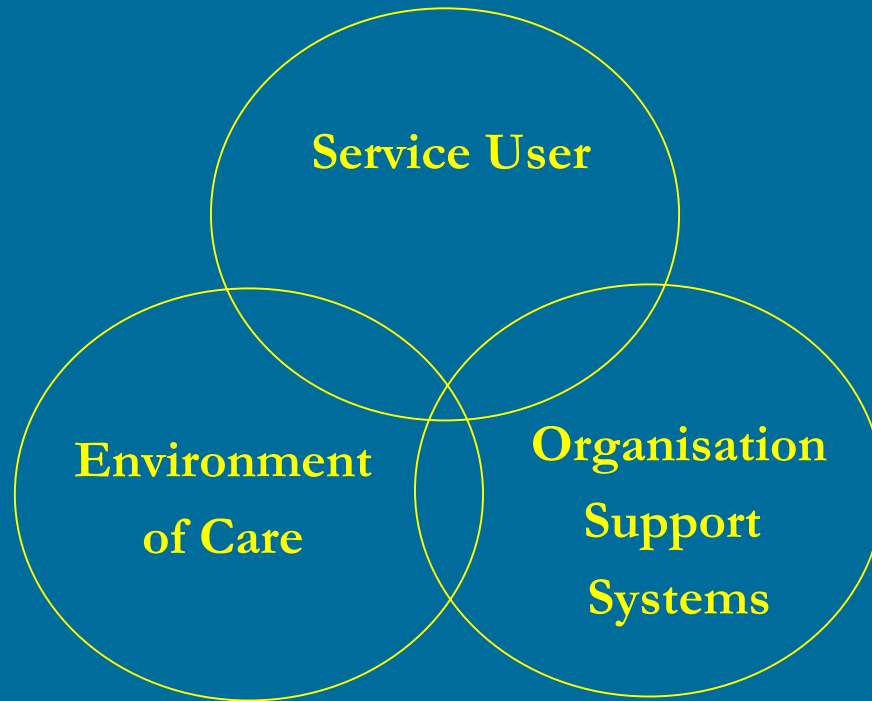

Risk Management Process

Risk Assessments & Risk Registers

Identifying risks: where?

Risk Identification: how?

Internal

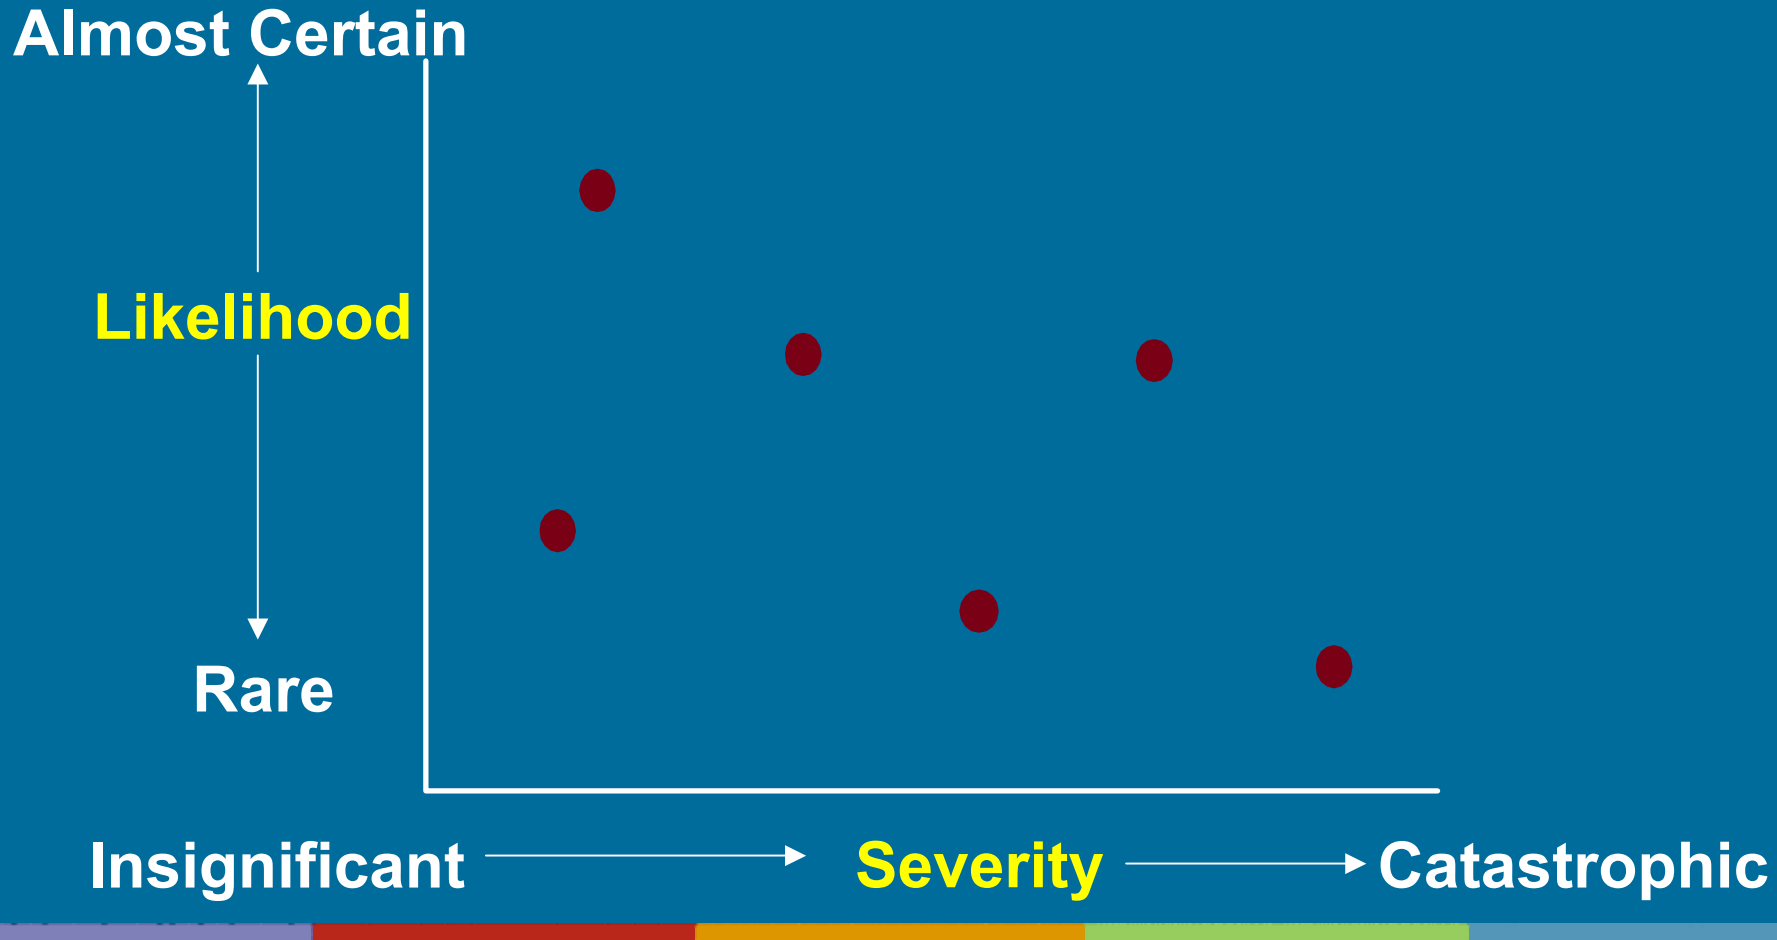

- Incidents
- Complaints
- Sickness absence / staffing levels
- Risk assessments
- Audits
- Team meetings / workshops

External

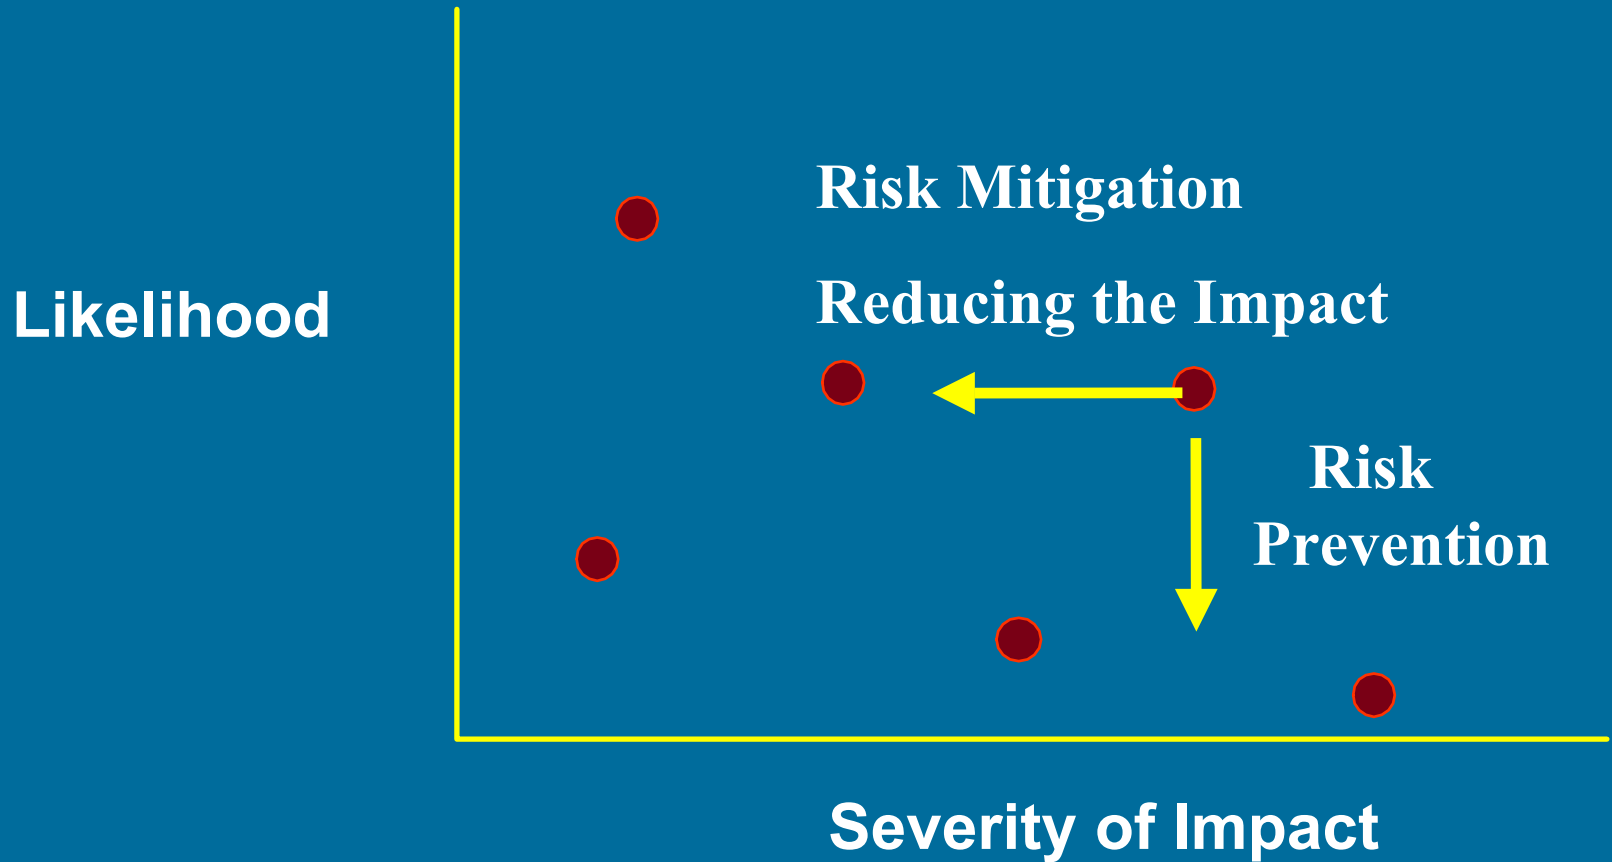

- Audits
- External Inspections
- New legislation and policy
- Mental Health Commission
- Hospital Advisory Service
- Health & Social Services Regulation & Improvement Authority

Risk Analysis

Using information to determine the likelihood of reoccurrence and severity of impact

The response: Controlling / Treating Risk

Risk Treatment Options

**ELIMINATE
or AVOID**

TRANSFER

ACCEPT

REDUCE

The Role and Responsibility of the Trust

- Organise for risk management
- Establish policies and procedures
- Training and education
- Gather information
- Share information
- Manage incidents, claims and complaints
- Learn from these
- Prevent future adverse incidents

The Role and Responsibility of Managers

- Managers:
 - Risk Management Strategy and systems
 - Promoting Risk Management awareness
 - Ensuring Risk Assessments completed and communicated
 - Encouraging adverse event / incident reporting, near miss, and learning
 - Releasing staff for training
 - Identify and release staff to act as risk assessors
 - Monitoring professional/clinical and social care standards
 - Ensure compliance with standards and legislation
- 

Your Role and Responsibility

- Report incidents and near misses
 - Report concerns/risks
 - Get involved in assessing risk
 - Learn from complaints
 - Maintain confidentiality
 - Be aware of professional standards and legal responsibilities
 - Deliver safe professional/clinical and social care
 - Be familiar and comply with the Trust Risk Management policies and systems
- 

The Trusts' commitment to you: Trust Policy Statement – Incident Reporting

The Trust believe that the systematic identification, analysis and control of risk will be facilitated by effective incident recording, which will be afforded a high priority within the Trust

An educational process and the establishment of a supportive, open and learning culture that encourages staff to report mistakes, incidents and near misses through the appropriate channels will underpin this.

Trust Policy Statement – Incident Reporting

The Trust supports an open and fair culture that means:

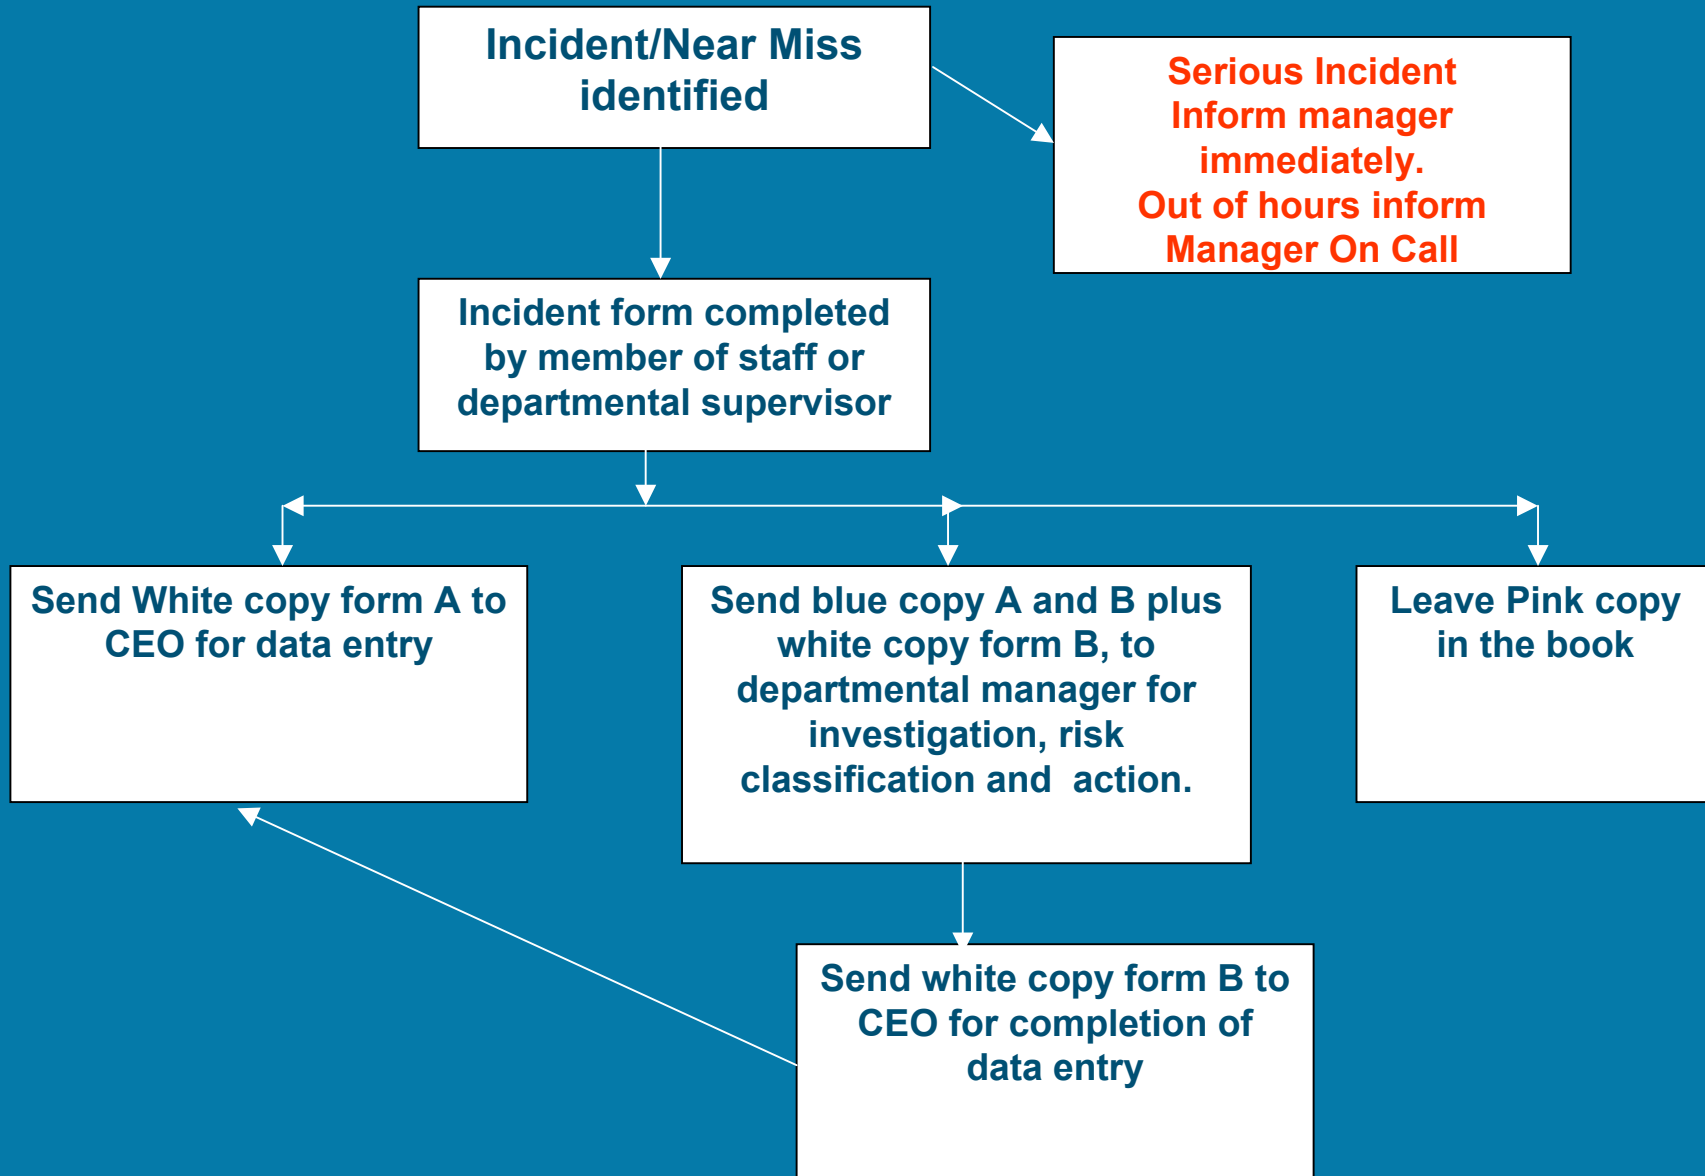

Staff who make a prompt and honest report in relation to an incident, near miss or mistake will not be disciplined except under the following circumstances :

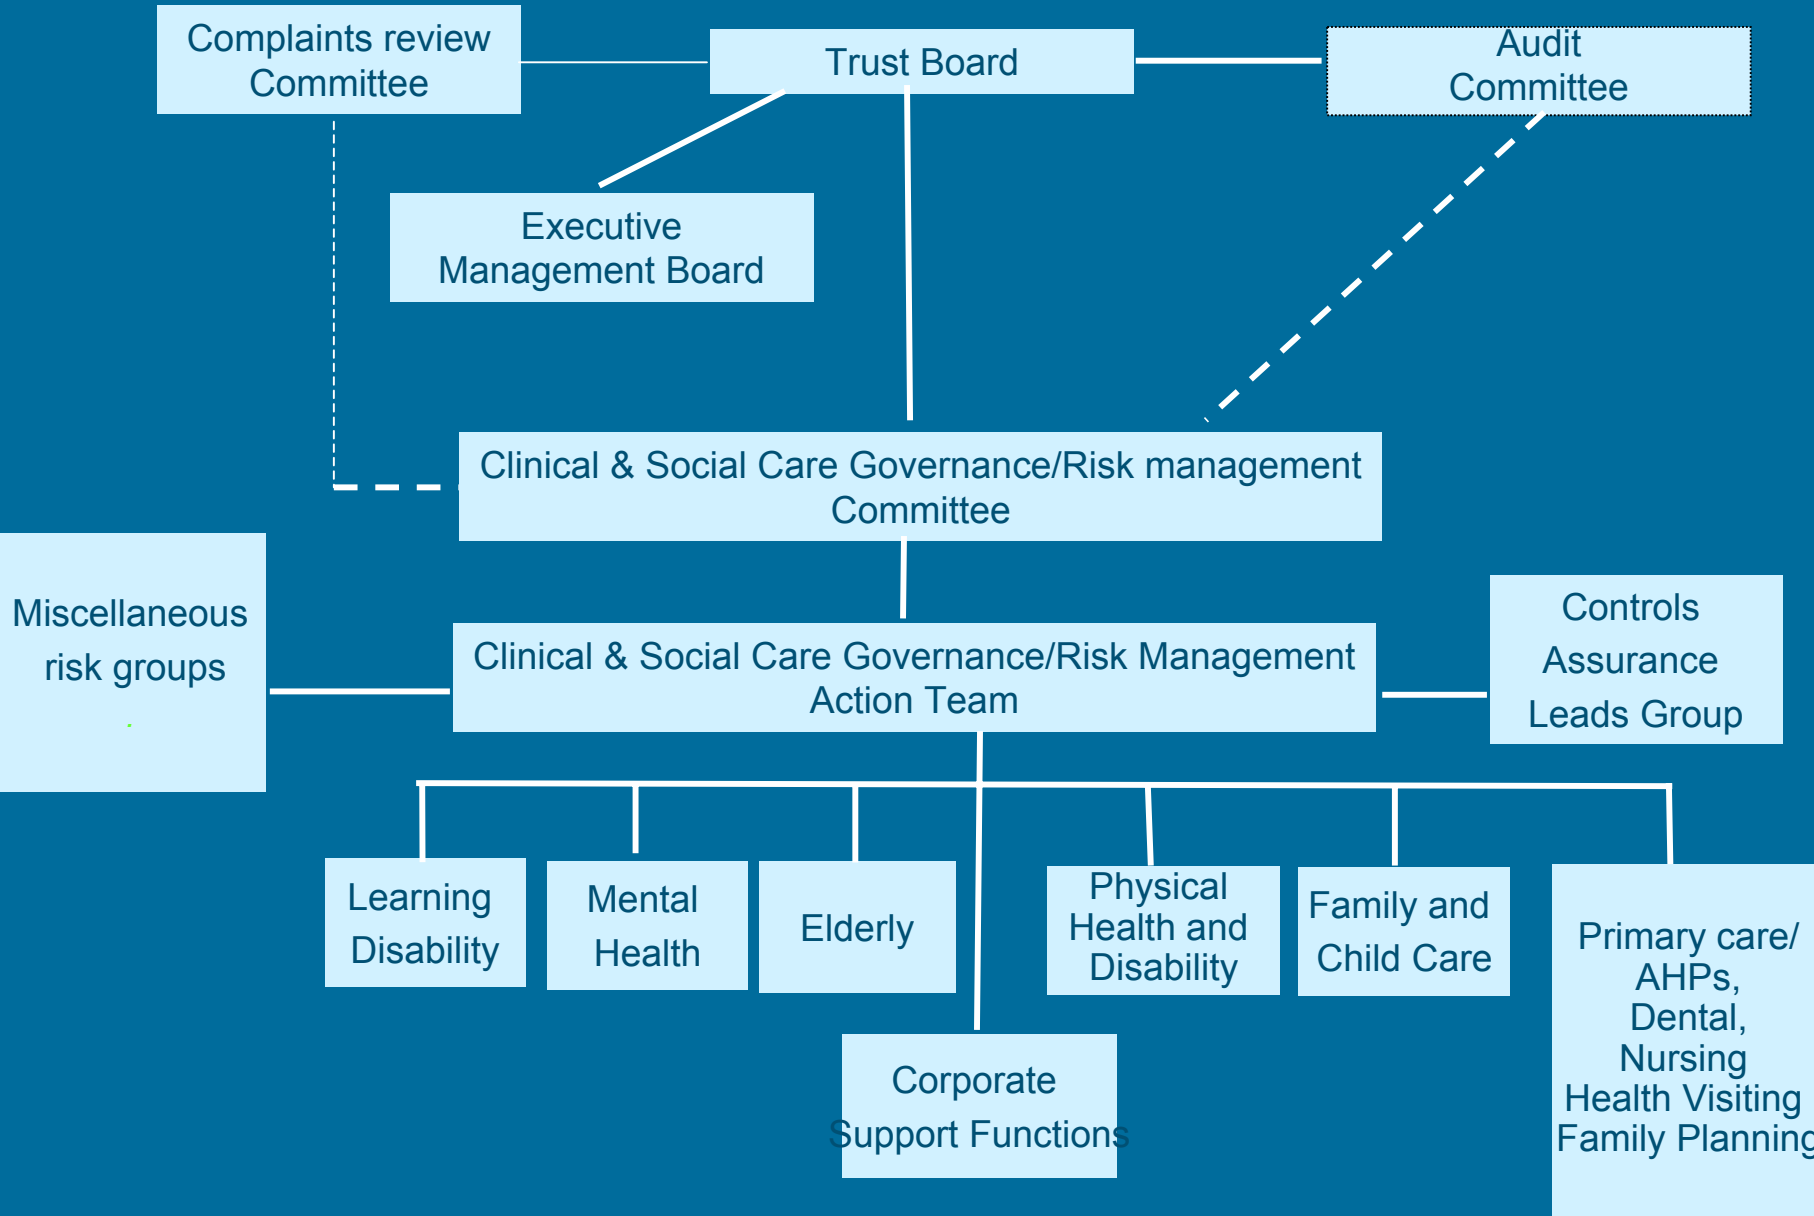

Where the member of staff acted in a **criminal deliberate or malicious** manner

Where the member of staff is guilty of wilful or gross carelessness or **neglect** contravening the Trust policies and procedures and/or professional codes of conduct and could **reasonably be expected to appreciate the direct consequences of his/her behaviour**

Where an incident follows other similar incidents of a similar nature and the Trust has provided **all necessary training, counselling and supervision** to prevent a reoccurrence

Flow of Information

Learning lessons: a practical example

- Community equipment
 - Elderly lady injured
 - Incident investigated
 - Multi-disciplinary review team
 - Implement service changes
 - Share learning
- 

Not sure what to do ?

*If in doubt –
contact
