Dear Colleague

Northern Ireland Avian Influenza Diagnostic Algorithm

There has been an increase in the number of countries internationally which have been affected by outbreaks of Avian Influenza in poultry, including a number of countries in Europe. Up to date information on developments in Avian Influenza and geographic spread is available on the website of the World Health Organisation at www.who.int.

The attached diagnostic algorithm has been produced by the Communicable Disease Surveillance Centre (CDSC) in Northern Ireland and outlines the basic steps in the diagnosis of a patient with suspect Avian Influenza. The relevant contact details for specialist advice are also included.

This algorithm may be subject to change depending on developments in the arena of Avian Influenza diagnosis and practitioners are urged to regularly review the algorithm on the CDSC(NI) website at www.cdscni.org.uk. In addition, practitioners are advised to read the diagnostic algorithms on Avian Influenza produced by the Health Protection Agency (HPA) which are available on their website at www.hpa.org.uk. These algorithms are being regularly updated by HPA and practitioners are advised to check the website regularly.

Information on Avian Influenza is also available on the DHSSPS website at www.dhsspsni.gov.uk. This site gives basic information on Avian Influenza, an update on current epidemiology and provides the links to the other websites detailed above.

Yours sincerely

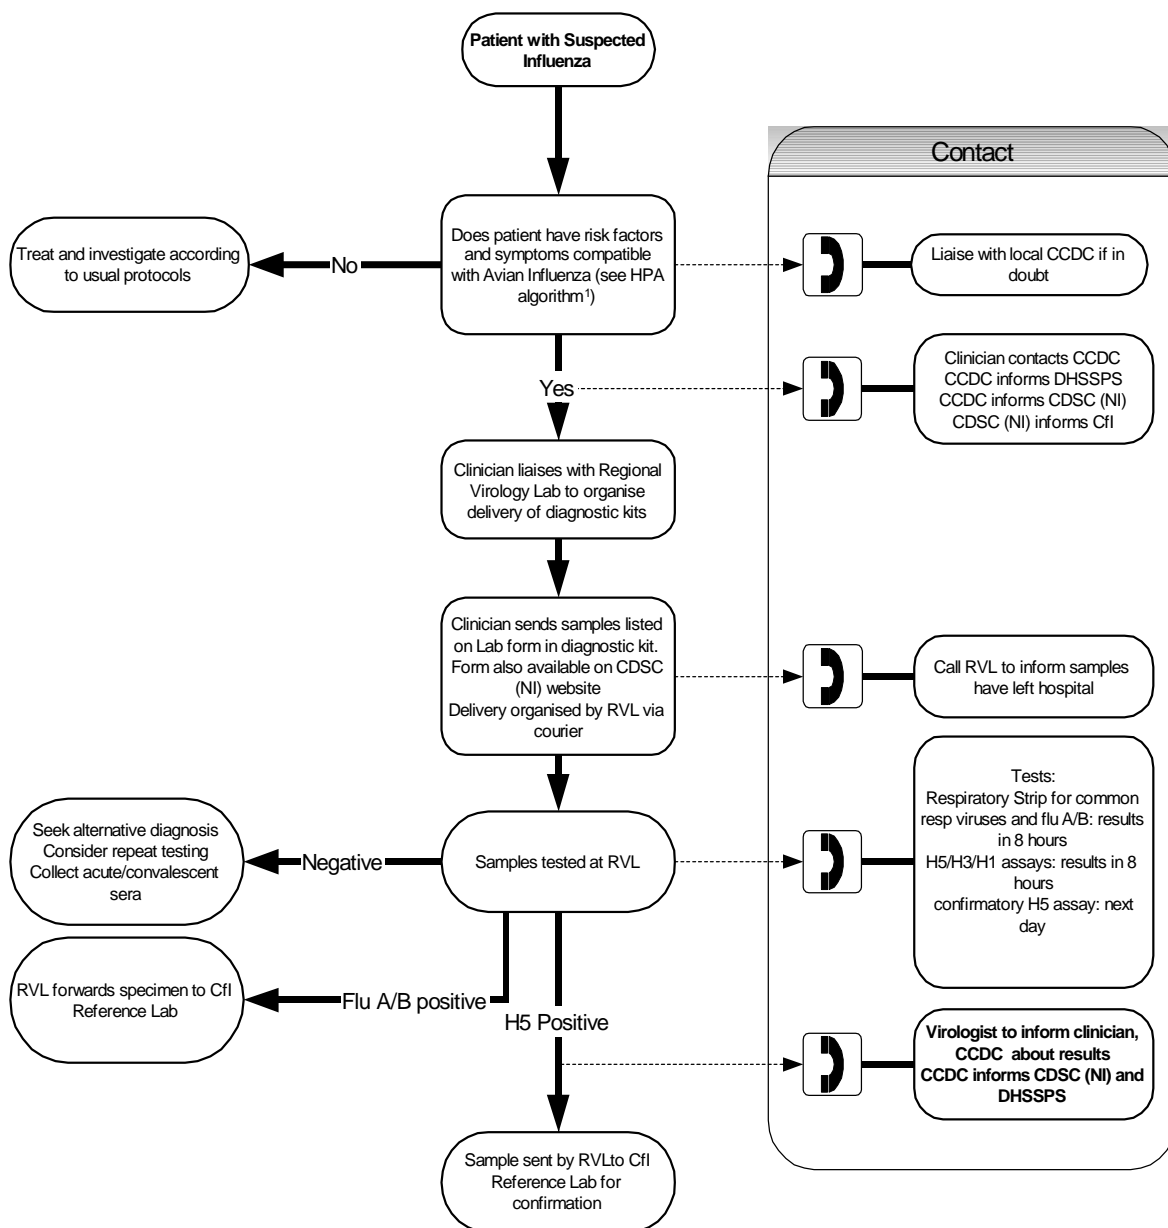

Dr Lorraine Doherty
Senior Medical Officer (Communicable Diseases)

cc: Chief Medical Officer, DHSSPS
Deputy Chief Medical Officer, DHSSPS
Dr E Mitchell, Principal Medical Officer, DHSSPS
Pandemic Influenza Team, DHSSPS
Ms Claire Baxter, Information Officer, DHSSPS
Dr Lourda Geoghegan
Regional Epidemiologists

This letter is available at www.dhsspsni.gov.uk and also on the DHSSPS Extranet which can be accessed directly at <http://extranet.dhsspsni.gov.uk> or by going through the HPSS Web at <http://www.n-i.nhs.uk> and clicking on DHSSPS.
